DETAILED ACTION

Response to Amendment

In response to pre-amendments A and B, claims 1-84 are cancelled and the newly added claims 85-173 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 85-90,92-107,114-115,118-128,131-132,139-149,156-165, and 171-173, drawn to an Interface Apparatus, classified in class 434, subclass 262.
- II. Claims 91,108-113,116-117,133-138,150-155, and 166-170, drawn to a grasping member, classified in class 285, subclass 18.
- III. Claims 129-130, drawn to a mock anatomical assembly, classified in class 623, subclass 11.11.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a coupling mechanism that may be used to couple any assembly capture mechanism to a peripheral device such as a mechanical coupler that is moved inside a mechanical housing to apply force and measure a plurality of items inside the housing. In the instant case, invention III has separate utility such as an anatomical simulation assembly that may be used with a plurality of

Art Unit: 3714

instruments and devices either connected to the invention of group I, or separate from that invention, but still useful for instruction in anatomy training. See MPEP § 806.05(d).

In addition, if the applicant elects the invention of Group I, applicant must also elect one of the following species of Group I for prosecution on the merits. This application contains claims directed to the following patentably distinct species of the claimed invention: Interface Apparatus Simulator Pivoting Mechanism and an Interface Apparatus Simulator Coupling Mechanism.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 85 and 87 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3714

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Guy Tucker on 11/13/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
